DM3730 / AM3703 SOM-LV System on Module

:: SUPPORTED PROCESSORS:

DM3730
AM3703

The Logic PD DM3730 SOM-LV presents a high-performance, full-featured System on Module (SOM) with all the necessary connectivity interfaces necessary for today's market-changing products.

Based on Texas Instruments' DaVinci™ DM3730 digital media processor, the DM3730 SOM-LV boasts PC-like speeds up to 1 GHz and contains on-board Wi-Fi (802.11b/g/n) and Bluetooth 2.1 + EDR technology wireless radios, and a 10/100 Ethernet controller.

The DM3730 SOM-LV is available in several standard configurations, including TI's Sitara™ AM3703 ARM microprocessor. By remaining footprint compatible with Logic PD's existing OMAP35x SOM-LV product line, the DM3730 SOM-LV extends the roadmaps of existing products and provides an upgrade path from today's products to future technologies.

By starting with the corresponding Zoom™ DM3730 Development Kit, engineers can write application software on the same hardware that will be used in the final product.

DM3730 / AM3703 SOM-LV
