

Quality Tools for Today's Professionals since 1958

The **MP-800** Magnespot is an **Intelligent Reference Point Locator** that gives users complete certainty before drilling or cutting.

Use to Drill through Exterior Walls, drill from attics/basements into wall cavities, or drill on angles/corners. Also use to find reference points in complicated construction and commercial buildings.

Operation is simple! Place the Transmitter on the point you need to find. On the other side of the wall, ceiling, or floor, the Receiver will draw you to the source of the signal with its four red LED arrows. When you are perfectly lined up all 4 Arrows illuminate. The MP-800 is accurate up to 1/2" and works at distances up to 40 inches away!

Specifications:

Accuracy to within 1/2" from 20" and within an inch at a range of 40"

One battery for each, transmitter & receiver

Estimated battery life 4 hours

Kit Includes:

- Transmitter
- Receiver
- 2 9V Batteries
