

Four-Channel ESD Suppressor PolySurg™ 42510ESDA-TR1

Description

The Cooper Bussmann® PolySurg™ 42510ESDA four-channel array ESD suppressor protects sensitive electronic circuits from the threat of electrostatic discharge (ESD) without distorting data signals. This protection is a result of its ultra-low capacitance (0.1pF typical) that is well suited for HDMI ESD protection applications.

Features

- Halogen free, lead free and RoHS compliant for global applications
- Ultra-low capacitance (0.1pF typical) ideally suited for protecting high speed data applications
- Provides ESD protection with fast response time (<1ns) allowing equipment to pass the IEC 61000-4-2 Level 4 test
- Four (4) channel array
- Zero signal distortion
- Low leakage current (<0.01μA typical)

Applications

Applied to a high speed signal interface, the 42510ESDA protects:

- Digital video equipment
- Mobile phone
- GPS Antenna
- Bluetooth communication equipment antenna circuit
- IEEE-1394
- DVI
- HDMI

Soldering Recommendations

- Compatible with lead and lead-free solder reflow processes
- Hand soldering - soldering tip should not directly touch part - 280°C max for 3 sec. max
- Peak reflow temperatures and durations:
 - IR Reflow = 260°C max for 20 sec. max
 - Wave Solder = 260°C max for 10 sec. max

Recommended IR Reflow Profile

Design Considerations

- Follow the soldering recommendations to avoid deforming product
- Do not use high temperature, high humidity or corrosive atmospheres (sulfide and chloride gas) that could damage the solderability
- Moisture Sensitivity Level (MSL) according to J-STD-020 standard: Level 2 (Floor Life 1 year under <30°C/65%RH conditions)
- Solderability requirement according to IPC/JEDEC J-STD-002C, Test D, Test B1
- Use Sn/Ag/Cu (96.5/3.0/0.5) or equivalent solder and activated flux #5 or equivalent.
