

Key features

- Sealed IP 68 (mated connectors)
- Mechanically keyed : ensures correct polarization and alignment.
- Contact arrangements : from 2 to 10 contacts.
- Wire gauge range from 28 AWG to 14 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

User advantages Temporary immersion IP 68

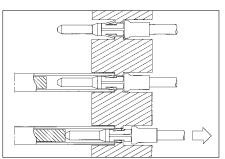

6-collet cluster

Allows a wide range of cable diameter applications for a single connector. Reduces inventory variations.

Removable contacts

Crimp versions allow easier wiring and maintenance.

Part number system

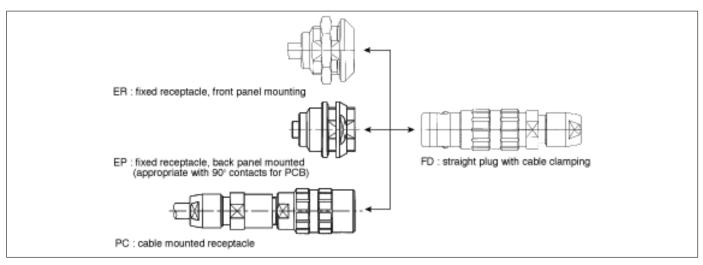

Basic series	JKX FD 1 G 05 M C SDS M
Shell configuration	FD - ER - EP - PC
Size	0 - 1
Keying	G
Contact layouts	02 10 (see page 33)
Contact type	M : pin F : socket (in relation with keying)
Contact termination	C: crimp; S: solder; P*: straight PCB tails; Q*: 90° PCB tails; W: 0.7 mm clipped solder
Material & surface plating	S : Outer shell in brass alloy with glossy chrome over nickel N : Outer shell in brass alloy with black plating (consult us) D : Obligatory suffix
	 S: Insulator in PPS P: Insulator in Peek (for Ø 0.5 mm contacts only) Obligatory suffix for layouts including contacts of Ø 0.5 mm
Options	 M: Connector with backnut for protective boot (protective boot to order separately page 34) G: Connector adapted to accomodate larger cables (Ø 4.5 to 6 in size 0 and Ø 6 to 8 in size 1) R: Red dot (possible for FD, PC, ER only)

^{*} For receptacles with female contacts only.

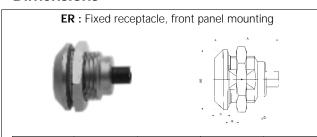

Shell type

Available JKX shells

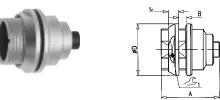

Dimensions

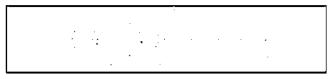

Size	Α	В	С	Ø D
0	19.5	4.5	4	18
1	24.5	8.5	4.5	20

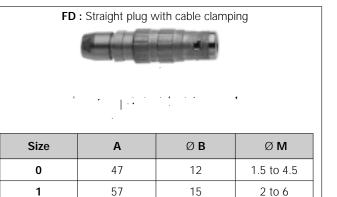

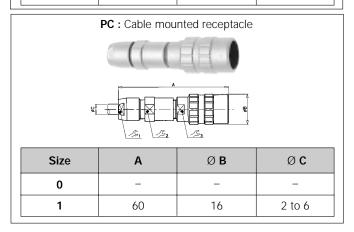

Size	А	В	С	Ø D
0	19.5	4.5	3.2	18
1	24.5	6	4	20

• Option G : to accomodate bigger cables

Size	A	Ø B	ØM
0	51	12	4.6 to 6
1	60	15	6 to 8

Keying

G keying is available in standard version (0° keying angle, plugs with pin contacts, receptacles with female contacts) for the 4 shell types. Reverse gender available in all layouts.

Shell size	Key	ER	EP	PC	FD
0	G	•	•	_	•
1	G	•	•	•	•

Watertightness design (mated connectors)

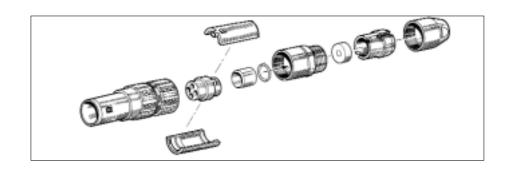

- ①: O'ring for sealing between receptacle and plug shell
- ②: O'ring for sealing between receptacle and panel
- ③: O'ring for sealing between plug body and backshell
- ④: seals to accomodate variety of cable diameters

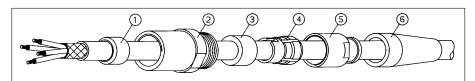

Wiring and assembly instructions: **STRAIGHT PLUG**

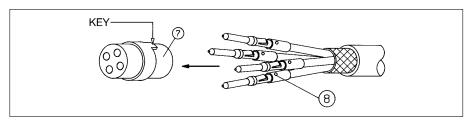

• Cable stripping: see page 37

Connector preparation

Contacts wiring: crimp contacts

2 - Adjust the crimping tool based on the wire size "AWG". (See wire size and crimp tool settings on the back of this locator.)

1 - Select the proper crimping tool (see page 48)

1 - Select the proper collet @ and the cable

2 - Slide protective boot ⑥, the backnut ⑤, the collet 4, the cable seal 3, the outershell 2 and the taper seat ① onto the cable. Strip end

seal 3 (see page 39).

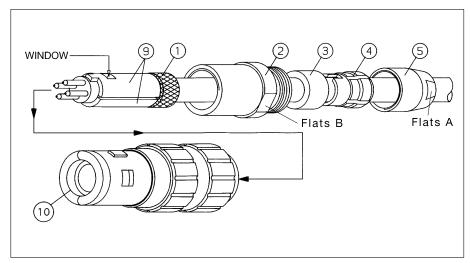

of cable (see pg. 16)

3 - Crimp the contacts 4 then insert the contact into the insulator until the clip is fully seated and cannot be removed.

· Contacts wiring: solder contacts

Fixed solder contacts 0.5 mm and 0.7 mm	Removable solder contacts from 0.9 mm to 1.3 mm
1 - Insert wire into solder cup and solder	1 - Insert wire into solder cup and solder 2 - Insert the contact into the insulator until the clip is fully seated and cannot be removed.

Connector assembly

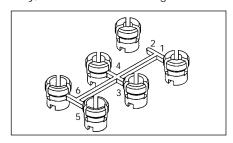

- 1 In case of shielded cable, comb out the shield and fold back over the tapper seat ①.
- 2 Position 2 half bushes 9, making sure that the insert key appears through the windows of one
- 3 Position the taper seat ① on the half bushes ⑨.
- 4 Position all the sub-assembly in connector housing ®, making sure to keep the subassembly well aligned.
- 5 Screw the outershell 2 following the torque values on page 39. Install the cable seal 3 and the collet @ into the outershell @ then screw the backnut ⑤ till bottoming. Use 2 wrenches well positionned on the flats A and B. Place a wrench to grip flats B, use the other wrench to tighten the backnut at the flats A following the torque values on page 39.
- 6 Install the protective boot 6 if applicable.

Wiring and assembly instructions

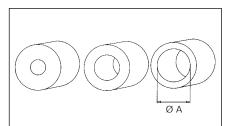

• Collets selection according to cable diameters
3 or 5 collets per shell size allow a wide range of cable diameters for a single connector. Cable out diameters are for information only, since values will change with each cable construction.

Callet number	Cable diameter				
Collet number	Shell size 0	Size 0, option G	Shell size 1	Size 1, option G	
1	1.5 - 2.5	-	2 - 2.5	-	
2	2.6 - 3.5	-	2.6 - 3.5	-	
3	3.6 - 4.5	-	3.6 - 4.5	6.1 - 6.7	
4	-	4.6 - 5.5	4.6 - 5.5	6.8 - 7.7	
5	-	5.6 - 6	5.6 - 6	7.8 - 8	

Collet number 4 in shell size 0 and collet number 6 in shell size 1 are not used.

 Cable seal selections according to cable size Discreet application based on cable diameter

Cable gland	Cable diameter				
ØA	Shell size 0	Size 0, option G	Shell size 1	Size 1, option G

^{*}Apply thread lock to back nut prior to assembly.

JBX Series sealed version size 2

Key features

- Sealed IP 67 (mated connectors)(FE, EC, SE, & PC)
- Watertight receptacles IP68 (HC & HH)
- Mechanically keyed : ensure correct polarisation and alignment.
- Contact arrangements : from 2 to 19 contacts.
- Wire gauge range from 26 AWG to 12 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

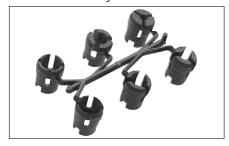

User advantages

Wet environment IP67

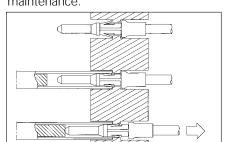

6-collet cluster

Allows a wide range of cable diameter applications for a single connector. Reduces inventory variations.

Removable contacts (EC, FE, SE & PE)

Crimp versions allow easier wiring and maintenance.
