8.0 OTHER INFORMATION

Products conform to the following environmental ratings:

Temperature: 105°C

Vibration: On-Body

Sealing: Un-Sealed

To ensure compliance with our product validation, it is imperative that our product meet the print dimensions. Any non-conformance with the true position of the PCB pins or mating interface will create performance failures that include; PCB installation, increased mate/unmate forces and electrical discontinuities.

To this effect, Molex does not recommend or endorse the ganging of individual Stac64 header assemblies by our distribution partners or customers. We have developed a repeatable and efficient method of producing 2, 3, and 4 bay header assemblies that meet the print requirements to optimize product performance.

For IR Reflow applications, part numbers 34691-6XXX (Plastic pin alignment plate or "PAP") headers should be used. The use of part numbers 34691-0XXX (Mylar PAP) has been reported to cause soldering issues.
