Don't expose yourself to Carbon Monoxide!

Review the chart below for the maximum allowable exposure limits and symptoms developed with CO inhalation.

Concentration of CO in air	Exposure times and toxic symptoms
9ppm	The maximum allowable concentration for short term exposure in a living area according to ASHRAE
50ppm	The Federal OSHA standard for continuous exposure in any eight hour period.
200ppm*	Maximum concentration allowable any time according to OSHA. Slight headaches, fatigue, dizziness, nausea after 2-3 hours.
400ppm*	Frontal headaches within 1-2 hours, life threatening after 3 hours. Maximum allowable limit in flue gas according to EPA and AGA.
800ppm*	Headache, dizziness, nausea, and convulsions with 45 minutes. Unconsciousness within 2 hours. Death within 2-3 minutes.
1600ppm*	Headache, dizziness, and nausea within 20 minutes. Death within 1 hour.
3200ppm*	Headache, dizziness, and nausea within 5-10 minutes. Death within 30 minutes.
6400ppm*	Headache, dizziness, and nausea within 1-2 minutes. Death within 10-15 minutes.
12800ppm*	Death within 1-3 minutes.

* With exposure to this concentration and higher the effects can vary depending on size, age, sex, and health.

Carbon Monoxide Analyzers, Monitors, and Adapters

What About Carbon Monoxide?

National Ambient Air Quality Primary Standards in the US call for less than 9ppm carbon monoxide for an 8 hour average during any 12 month period.

Concentrations of 1 to 2 ppm may be found in homes with a normally operating gas furnace, to well over 1,000ppm in homes with a faulty furnace.

Just 200ppm CO over 2 to 3 hours can cause slight headache, fatigue, dizziness, and nausea.

Carbon Monoxide testing is crucial service provided by HVAC/R technicians

The Value Leader™

Turn over for technical information and accessory part numbers.

Common Sources of CO

gas appliances and heaters in cabins, campers, pools, and spas

Analyzers, Monitors, and Adapters

Specifications and Features

High Carbon Monoxide Analyzer For Forklift Emissions 706

The 706 tests forklift exhaust gases for the presence and location of carbon monoxide leaks. This instrument fits comfortably in your hand and operates with just the push of a button.

- Range: 0 ~ 9,999ppm <10,000ppm: 1.000 ~ 9.999%
- 1 ppm sensitivity
- Pump driven
- Pump flow block indicator
- Auto zero
- Backlit display
- Easy field calibration, low cost CO sensor

Carbon Monoxide Analyzer 707

The 707 tests flue gases at home or office spaces for the presence and location of carbon monoxide leaks. This instrument fits comfortably in your hand and operates with just the push of a button.

- Pump driven
- Pump flow block indicator
- 1 ppm sensitivity
- Measures from 0 to 9,999 ppm
- Auto zero
- Backlit display
- Easy field calibration, low cost CO sensor

Combination Ambient Carbon Monoxide and Combustible Gas Leak Detector 775

The TPI 775 is a state-of-the-art Carbon Monoxide and Combustible Gas Leak Detector. It is the first of its kind to combine both detection technologies into one easy to use hand-held and affordable instrument.

- Easy to use
- One hand operation
- Auto zero
- Back light
- Visible and audible alarm

Sensor Specifications

Type	Resolution	Range	Accuracy
Leak	<50ppm	0-50,000ppm	±10%
CO	1ppm	0-2,000ppm	±5ppm or 5%; whichever is greater

Carbon Monoxide Monitor 770

The 770 is a state-of-the-art carbon monoxide instrument designed to measure CO in ambient air. This palm-sized unit displays readings in 1 ppm increments.

- Measure CO from 0 to 999 PPM
- Displays the max. CO reading in PPM since power on
- Displays, in hours and minutes, time elapsed since power on
- Displays user set value of audible and visual alarm
- Audible alarm can be switched on or off by pressing SEL button

Carbon Monoxide Adapter

The A771 is a CO adapter designed to work with your DMM to measure ambient air CO. Can also be used as a personal CO alarm.

- Built-in Alarm is preset to 30ppm. Setting can be set by user.
- Use with any DMM with minimum 2 1/2 digit LCD, 2 or 4 Volt DC range and 10M Ohm or greater input impedance.
- Detect CO levels from 0-1999 ppm, with resolution as low as 0.1 ppm and ±5% of reading accuracy.
- Soft pouch included.

A740 Infrared Printer

Optional accessory for 706, 707, and TPI Flue Gas Analyzers.

- Easy to use
- Battery operated
- Self test facility
- Adjustable contrast
- Manual paper feed
- Maximum transmitting distance 16" (45cm)
- Compatible with most other combustion analyzers
