## INTRODUCTION

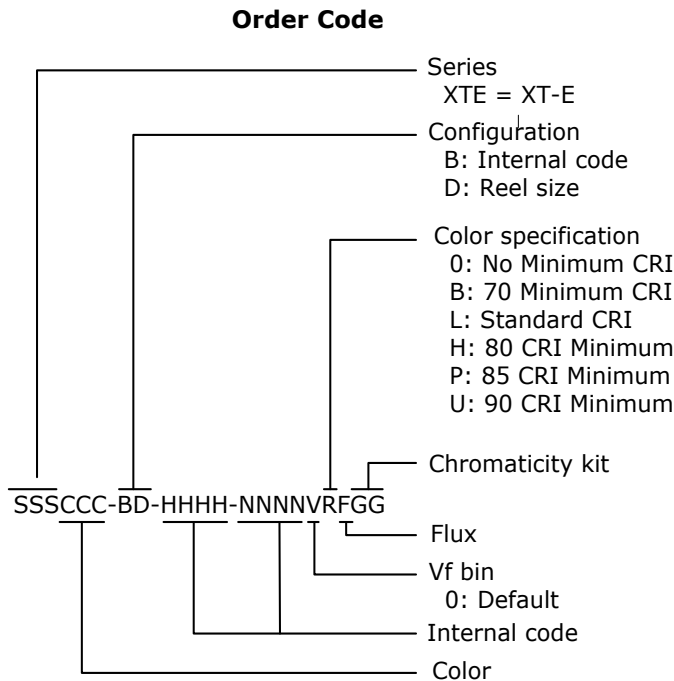

This document describes the product nomenclature required to select and order Cree’s XLamp XT Family LEDs. XLamp XT Family LEDs are tested and sorted into bins which are then combined into orderable kits identified by an order code.

All XLamp LEDs are tested and sorted by color and brightness into a unique bin. Each bin contains LEDs from only one color and brightness group and is uniquely identified by a bin code. White XLamp LEDs are sorted by chromaticity (color) and luminous flux (brightness). Color XLamp LEDs are sorted by dominant wavelength (color) and luminous or radiant flux (brightness). LEDs are shipped on reels containing LEDs from one bin and are always labeled with the appropriate bin code.

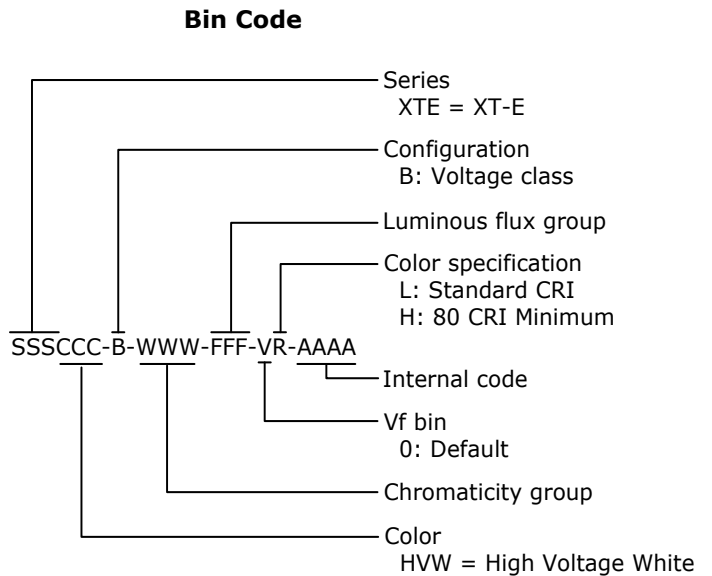

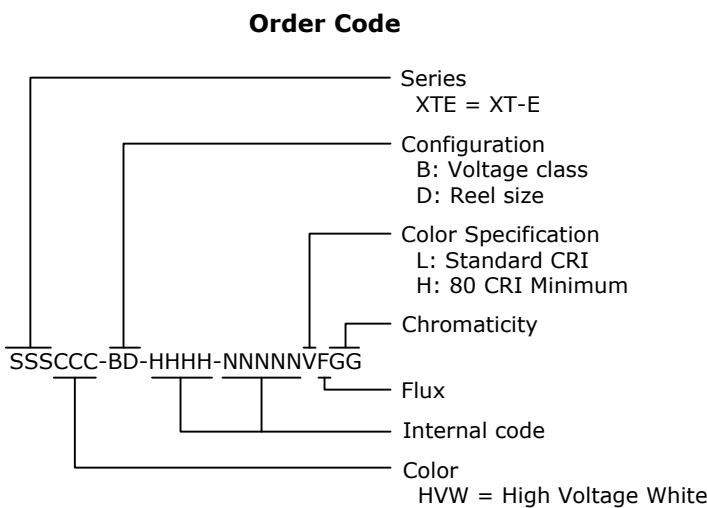

Kits contain LEDs from a number of similar bins and are fully defined by their order codes. A full explanation of the order codes for XLamp XT Family LEDs, as well as a list of standard order codes, is provided in this document.

**BIN AND ORDER-CODE FORMAT**

Bin codes and order codes for XT-E White are configured in the following manner:
