Tips on EMI Core Usages

■ Characteristics and how to count turns

Number of turns are counted by how many times the lead wire passes through the inner hole of the core. Do not count the number of lead wire winding outside the core, as it results in different turn count. (Fig. 1)

When desired performance can not be obtained just by 1 turn, impedance characteristics value can be raised by increasing the turn. In this case, the effective frequency band should be checked that it is in the desired range as adding turns results in lowering down the effective band range. (Fig. 2)

*Number of lead wire wound outside the core + 1
= Number of read wire passes through the inner hole of the core
= Turn count

Fig.1 How to count turns

Fig.2 Relationship between impedance and turn counts

■ Effective band range depending on core material

There are two materials of ferrite, Ni-Zn series and Mn-Zn series. Ni-Zn series is effective for MHz band range such as FM band while Mn-Zn series is effective for kHz band range.

Note that above effective band range is a reference only. Examination of effectiveness with actual instrument is necessary.

As Mn-Zn series has lower resistance compared to Ni-Zn series, make sure to provide adequate insulation before use.

Toroidal Cores with High Heat Resistance ESD-R-H Series [RoHS Compliant]

Features

- ①Wider operational temperature range.(-40℃~+120℃)
- ②Advanced characteristics achieved by using optimal core materials for target frequency range.
Low frequency range (ESD-R-M-H series)
High frequency range (ESD-R-N-H series)
- ③Flame retardancy: UL94V-0

Applications

- Automotive (EPS, etc.)
- Information and communication devices, audio-visual equipment, consumer electronics

Snap-on Cores for Round Cables with High Heat Resistance and Cable Holding Mechanism

ESD-SR-H/HL Series

[RoHS Compliant]

NEW
PRODUCT

Features

- ①Wider operational temperature range.
ESD-SR-160H/250H: -40℃~+100℃
ESD-SR-160HL/250HL: -40℃~+125℃
- ②Holding mechanisms provided
(Fixing of cables / enclosures with fixing bands possible)
- ③Split design allows easy post-fitting.

Applications

- Automotive (EPS, etc.)
- Information and communication devices, audio-visual equipment, consumer electronics

Cores Suitable for a Low Frequency Noise [RoHS Compliant]

Features

- ① Performs effectively in a low frequency range, mainly in the AM band (from 535 to 1605 kHz), by using a high permeability material (Mn-Zn ferrite).
- ② Available in various shapes and sizes depending on applications.

Applications

- Consumer electronics
(air conditioners, refrigerators, etc.)
- Industrial equipment (INV, robots, etc.)

Precautions

- The names of the products and the specifications in this catalog are subject to change without notice for the sake of improvement. The manufacturer also reserves the right to discontinue any of these products. At the time of delivery, please ask for specifications sheets to check the contents in order to use the products properly and safely.
- Descriptions in this catalog regarding product characteristics and quality are based solely on discrete components. When using these components, be sure to check the specifications with the component in question mounted on the products.
- The manufacturer's warranty will not cover any disadvantage or damage caused by improper use of the products that deviates from the characteristics, specifications, or conditions for use described in this catalog.
- The products in this catalog are intended for use in ordinary electronic products. If any of these products are to be used in special applications requiring extremely high reliability, such as in aviation equipment and nuclear power controllers where product defects might pose a safety risk, please consult your NEC TOKIN sales representatives.
- Though the manufacturer has taken all possible precautions to ensure the quality and reliability of its products, improper use of products may result in bodily injury, fire, or similar accident. If you have any questions regarding the use of the products in question, please consult your NEC TOKIN sales representatives.
- Please be advised that the manufacturer accepts no responsibility for any infraction by users of the manufacturer's products on third party patents or industrial copyrights. The manufacturer is responsible only when such infractions are attributable to the structural design of the product and its manufacturing process.
- Export Control
For customers outside Japan
NEC TOKIN products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons(nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.
For customers in Japan
For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.
- This catalog is current as of October 2013.
