Digital I/O Terminal 3-tier Terminal Block Type

GX-ID16□2/OD16□2/MD16□2

A common terminal is provided for each contact. It eliminate the needs for relay terminal blocks.

- It is unnecessary to share the common terminal among multiple contacts.
  Easy-to-find wiring locations.
- Detouchable screw terminal block facilitates the maintenance.
- Input response time can be switched for high-speed processing.
- Selectable node address setting methods: setting with rotary switch and with tool software.
  When setting the nodes with rotary switch, setting is easy and node identification becomes possible for maintenance.
