

3-Pin Supply Voltage Supervisors

Check for Samples: [TLV809J25](#), [TLV809L30](#), [TLV809K33](#), [TLV809I50](#)

FEATURES

- 3-Pin SOT23 Package
- Supply Current: 9 μ A (Typical)
- Precision Supply Voltage Monitor: 2.5 V, 3 V, 3.3 V, 5 V
- Power-On Reset Generator with Fixed Delay Time of 200 ms
- Pin-for-Pin Compatible with MAX809
- Temperature Range: -40°C to $+85^{\circ}\text{C}$

APPLICATIONS

- DSPs, Microcontrollers, and Microprocessors
- Wireless Communication Systems
- Portable/Battery-Powered Equipment
- Programmable Controls
- Intelligent Instruments
- Industrial Equipment
- Notebook and Desktop Computers
- Automotive Systems

DESCRIPTION

The TLV809 family of supervisory circuits provides circuit initialization and timing supervision, primarily for DSPs and processor-based systems.

During power-on, $\overline{\text{RESET}}$ is asserted when the supply voltage (V_{DD}) becomes higher than 1.1 V. Thereafter, the supervisory circuit monitors V_{DD} and keeps $\overline{\text{RESET}}$ active as long as V_{DD} remains below the threshold voltage V_{IT} . An internal timer delays the return of the output to the inactive state (high) to ensure proper system reset. The delay time ($t_{\text{d(typ)}}$ = 200 ms) starts after V_{DD} has risen above the threshold voltage, V_{IT} . When the supply voltage drops below the V_{IT} threshold voltage, the output becomes active (low) again. No external components are required. All the devices in this family have a fixed sense-threshold voltage (V_{IT}) set by an internal voltage divider.

The product spectrum is designed for supply voltages of 2.5 V, 3 V, 3.3 V, and 5 V. The circuits are available in a 3-pin SOT-23 package. The TLV809 devices are characterized for operation over a temperature range of -40°C to $+85^{\circ}\text{C}$.

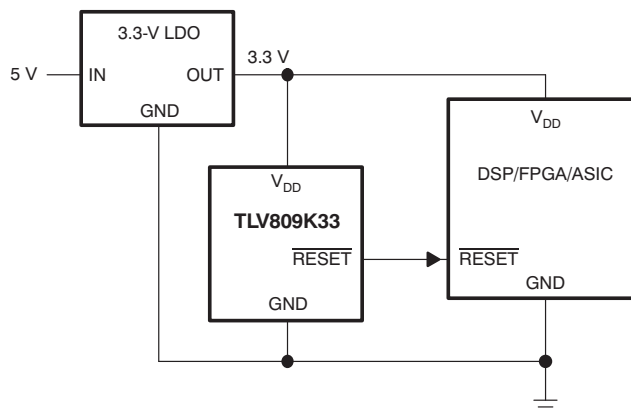

Figure 1. TYPICAL APPLICATION

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

All trademarks are the property of their respective owners.

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

PACKAGE/ORDERING INFORMATION⁽¹⁾

PRODUCT	THRESHOLD VOLTAGE	PACKAGE-LEAD	PACKAGE DESIGNATOR	SPECIFIED OPERATING TEMPERATURE	PACKAGE MARKING	ORDERING INFORMATION	TRANSPORT MEDIA, QUANTITY

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

Over operating free-air temperature range (unless otherwise noted) .

	VALUE	UNIT
V_{DD} Supply voltage ⁽²⁾	7	V
All other pins ⁽²⁾	–0.3 to 7	V
I_{OL} Maximum low output current	5	mA
I_{OH} Maximum high output current	–5	mA
I_{IK} Input clamp current ($V_I < 0$ or $V_I > V_{DD}$)	±20	mA
I_{OK} Output clamp current ($V_O < 0$ or $V_O > V_{DD}$)	±20	mA
T_A Operating free-air temperature range	–40 to +85	°C
T_{stg} Storage temperature range	–65 to +150	°C
Soldering temperature	+260	°C

- (1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values are with respect to GND. For reliable operation the device should not be operated at 7 V for more than $t = 1000h$ continuously

THERMAL INFORMATION

THERMAL METRIC ⁽¹⁾		TLV809	TLV809	UNITS
		DBV	DBZ	
		3 PINS	3 PINS	
θ_{JA}	Junction-to-ambient thermal resistance	242.1	286.9	°C/W
θ_{JCTop}	Junction-to-case (top) thermal resistance	213.0	105.6	
θ_{JB}	Junction-to-board thermal resistance	123.4	124.4	
ψ_{JT}	Junction-to-top characterization parameter	45.7	25.8	
ψ_{JB}	Junction-to-board characterization parameter	130.9	107.9	
θ_{JCbott}	Junction-to-case (bottom) thermal resistance	—	—

RECOMMENDED OPERATING CONDITIONS

At specified temperature range (unless otherwise noted).

		MIN	MAX	UNIT
V_{DD}	Supply voltage	2	6	V
T_A	Operating free-air temperature range	–40	+85	°C

ELECTRICAL CHARACTERISTICS

Over recommended operating free-air temperature range (unless otherwise noted).

PARAMETER			TEST CONDITIONS		MIN	TYP	MAX	UNIT
V _{OH}	High-level output voltage		V _{DD} = 2.5 V to 6 V, I _{OH} = −500 μA		V _{DD} − 0.2			V
			V _{DD} = 3.3 V, I _{OH} = −2 mA		V _{DD} − 0.4			
			V _{DD} = 6 V, I _{OH} = −4 mA		V _{DD} − 0.4			
V _{OL}	Low-level output voltage		V _{DD} = 2 V to 6 V, I _{OH} = 500 μA		0.2			V
			V _{DD} = 3.3 V, I _{OH} = 2 mA		0.4			
			V _{DD} = 6 V, I _{OH} = 4 mA		0.4			
Power-up reset voltage ⁽¹⁾			V _{DD} ≥ 1.1 V, I _{OL} = 50 μA		0.2			V
V _{IT−}	Negative-going input threshold voltage ⁽²⁾		T _A = −40°C to 85°C		2.20	2.25	2.30	v
					2.58	2.64	2.70	
					2.87	2.93	2.99	
					4.45	4.55	4.65	
V _{hys}	Hysteresis				30		mV	
					35			
					40			
					60			
I _{DD}	Supply current		V _{DD} = 2 V, Output unconnected		9	12	μA	
			V _{DD} = 6 V, Output unconnected		20	25		
C _i	Input capacitance		V _I = 0 V to V _{DD}		5			pF

(1) The lowest supply voltage at which **RESET** becomes active. $t_r, V_{DD} \geq 15 \text{ ms/V}$.

(2) To ensure best stability of the threshold voltage, a bypass capacitor (0.1- μF ceramic) should be placed near the supply terminals.

TIMING REQUIREMENTS

At $R_L = 1\text{ M}\Omega$, $C_L = 50\text{ pF}$, $T_A = +25^\circ\text{C}$.

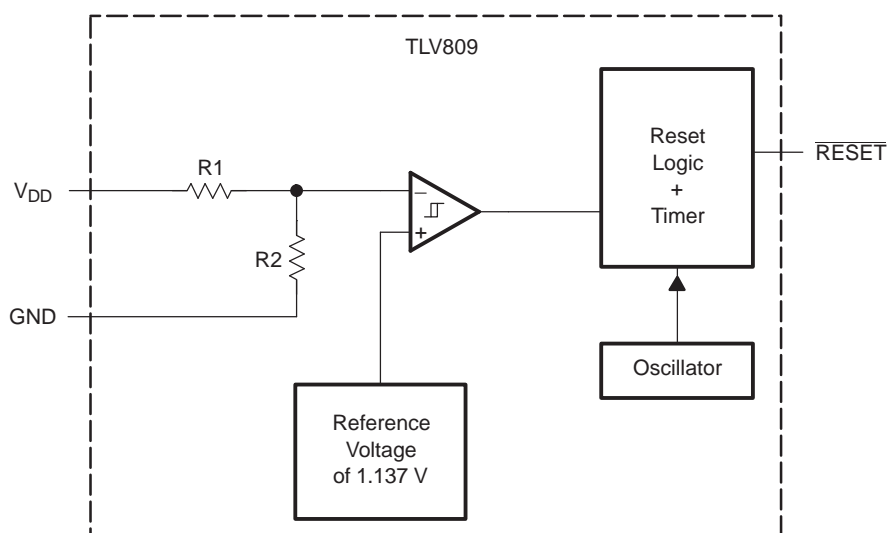

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_w Pulse width at V_{DD}	$V_{DD} = V_{IT-} + 0.2\text{ V}$, $V_{DD} = V_{IT-} - 0.2\text{ V}$	3			μs

SWITCHING CHARACTERISTICS

At $R_L = 1\text{ M}\Omega$, $C_L = 50\text{ pF}$, $T_A = +25^\circ\text{C}$.

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_d Delay time	$V_{DD} \geq V_{IT-} + 0.2\text{ V}$; see timing diagram	120	200	280	ms
t_{PHL} Propagation (delay) time, high-to-low-level output	V_{DD} to $\overline{\text{RESET}}$ delay $V_{IL} = V_{IT-} - 0.2\text{ V}$, $V_{IH} = V_{IT-} + 0.2\text{ V}$		1		μs

REVISION HISTORY

NOTE: Page numbers from previous revisions may differ from page numbers in the current version.

Changes from Revision B (September 2010) to Revision C	Page
• Changed TLV809L30 DBZ ordering information column in Package/Ordering Information table	2
• Changed TLV809K33 DBZ ordering information column in Package/Ordering Information table	2
• Changed first TLV809I50 DBZ ordering information entry in Package/Ordering Information table	2
<hr/>	
Changes from Revision A (July 2010) to Revision B	Page
• Updated document format to current standards	1
• Added DBZ package to pinout figure	1
• Added DBZ package to <i>Package/Ordering Information</i> table	2
• Added <i>Thermal Information</i> table	2
• Changed Figure 3	5

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

⁽⁴⁾ Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
