

Fully Integrated Power Management with Power Path and Battery Charger

Check for Samples: [TWL6032](#)

FEATURES

- Five highly efficient buck converters
 - One 3 MHz, 0.6 to 2.1 V @ 5.0 A, DVS-capable
 - One 6 MHz, 0.6 to 2.1 V @ 2.5 A, DVS-capable
 - Three 6 MHz, 0.6 to 2.1 V @ 1.1 A, one being DVS-capable
 - Extended mode for higher output voltages
- 11 general-purpose low-dropout voltage regulators (LDOs)
 - Six 1.0 to 3.3 V @ 0.2 A with battery or preregulated supply:
 - One can be used as vibrator driver.
 - One 1.0 to 3.3 V @ 50 mA with battery or preregulated supply
 - One low-noise 1.0 to 3.3 V @ 50 mA with battery or preregulated supply
 - One 3.3 V @ 100 mA USB LDO
 - Two LDOs for TWL6032 internal use
- USB OTG module:
 - ID detection, accessory charger adapter (ACA) support
 - Accessory detection protocol (ADP) support
- Backup battery charger
- 12-bit sigma-delta analog-to-digital converter (ADC) with 19 input channels:
 - Seven external input channels
- 13-bit Coulomb counter with four programmable integration periods
- Low power consumption:
 - 8 μ A in BACKUP state
 - 20 μ A in WAIT-ON state
 - 110 μ A in SLEEP state, with two DC-DCs active
- Real-time clock (RTC) with timer and alarm wake-up:
 - Three buffered 32-kHz outputs
- SIM and SD/MMC card detections
- Two digital PWM outputs
- Thermal monitoring:
 - High-temperature warning
 - Thermal shutdown
- Control:
 - Configurable power-up and power-down sequences (OTP memory)
 - Configurable sequences between SLEEP and ACTIVE states (OTP memory)
 - Three digital output signals that can be included in the startup sequence to control external devices
 - Two inter-integrated circuit (I²C™) interfaces
 - All resources configurable by I²C
- System voltage regulator/battery charger with power path from USB:
 - Input current limit to comply with USB standard
 - 3-MHz switched-mode regulator with integrated power FET for up to 2.0-A current
 - Dedicated control loop for battery current and voltage
 - External low-ohmic FET for power path and battery charging
 - Boost mode operation for USB OTG
 - Supplement mode to deliver current from battery during power path operation
 - Charger for single-cell Li-Ion and Li-polymer battery packs
 - Safety timer and reset control
 - Thermal protection
 - Input/output overvoltage protection
 - Charging indicator LED driver
 - Compliant with:
 - USB 2.0
 - OTG and EH 2.0
 - USB battery charging 1.2
 - YD/T 1591-2006
 - Japanese battery charging guidelines (JEITA)

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

UNLESS OTHERWISE NOTED this document contains PRODUCTION DATA information current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Copyright © 2011–2012, Texas Instruments Incorporated

- **Battery voltage range from 2.5 to 5.5 V**
- **Package 5.21 mm × 5.36 mm 155-pin WCSP**

APPLICATIONS

- **Mobile phones and smart phones**
- **Tablets**
- **Gaming handsets**
- **Portable media players**
- **Portable navigation systems**
- **Handheld devices**

DESCRIPTION

The TWL6032 device is an integrated power-management integrated circuit (PMIC) for applications powered by a rechargeable battery. The device provides five configurable step-down converters with up to 5.0-A current capability for memory, processor core, I/O, auxiliary, preregulation for LDOs, etc. It also contains nine LDO regulators for external use that can be supplied from a battery or a preregulated supply. The power-up/power-down controller is configurable and can support any power-up/power-down sequence (programmed in OTP memory). The RTC provides three 32-kHz clock outputs, seconds, minutes, hours, day, month, and year information, as well as alarm wakeup and timer. The TWL6032 device supports 32-kHz clock generation based on a crystal oscillator.

The device integrates a switched-mode system supply regulator from a USB connector. It includes power paths from the USB and battery with supplemental mode for immediate startup, even with an empty battery. The battery switch uses an external low-ohmic PMOS transistor allowing minimal serial resistance during fast charging and when operating from battery. The device can also be used without the external PMOS transistor; the battery is then always tied to the system supply and the switched-mode regulator is used for battery charging.

The TWL6032 device is available in a 155-pin WCSP package, 5.21 mm × 5.36 mm with a 0.4-mm ball pitch.

[Figure 1](#) shows the TWL6032 device block diagram.

Figure 1. TWL6032 Device Block Diagram

For the complete TWL6032 data sheet, contact your TI sales representative or omap4_companion@list.ti.com. The document is internally available for download on ESP under the corresponding TWL6032 product folders and can be shared with customers.

(1) The ordering numbers starting with "PTWL6032..." are for prototype devices. The ordering numbers will change to start with "TWL6032..." when the device is released to market.

(2) (P)TWL6032A1Bxxxx are not recommended for new designs. Please use (P)TWL6032A2Bxxxx versions.

Package Information

Figure 2 shows the TWL6032 package.

YFF (R–XBGA–N155)

DIE–SIZE BALL GRID ARRAY

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M–1994.
 - B. This drawing is subject to change without notice.
 - C. NanoFree™ package configuration.
 - D. This package contains Pb–free balls.

Dimensions:

- D: 5364 µm (nominal), 5334 µm (minimum), 5394 µm (maximum)
- E: 5214 µm (nominal), 5184 µm (minimum), 5244 µm (maximum)

Figure 2. TWL6032 Package

WARNING: EXPORT NOTICE

Recipient agrees to not knowingly export or re-export, directly or indirectly, any product or technical data (as defined by the U.S., EU, and other Export Administration Regulations) including software, or any controlled product restricted by other applicable national regulations, received from Disclosing party under this Agreement, or any direct product of such technology, to any destination to which such export or re-export is restricted or prohibited by U.S. or other applicable laws, without obtaining prior authorisation from U.S. Department of Commerce and other competent Government authorities to the extent required by those laws. This provision shall survive termination or expiration of this Agreement.

According to our best knowledge of the state and end-use of this product or technology, and in compliance with the export control regulations of dual-use goods in force in the origin and exporting countries, this technology is classified as follows:

US ECCN: EAR99

EU ECCN: EAR99

And may require export or re-export license for shipping it in compliance with the applicable regulations of certain countries.

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

⁽⁴⁾ There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

⁽⁵⁾ Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

⁽⁶⁾ Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
